General Rate Explanation

The \$10 rate would be appropriate for dry ADC of screened quality with the \$15 rate applying to material with manageable amounts of football sized debris. The \$20 rate would be applicable to material which requires SPSA to remove larger pieces of debris prior to its' beneficial reuse. All materials must be gradable (sufficiently dry) and have the same basic characteristics and appearance of clean fill before SPSA will consider using the material as cover.

All Rates to be Effective July 1, 2008, unless otherwise noted.
